INDOOR CANDLES

A woman with long brown hair, wearing a white shawl, is shown in a close-up, looking down at a small candle she is lighting with a match. The background is dark and out of focus. The lighting is soft, highlighting her face and the flame of the candle.

We foster innovations and develop environmentally friendly products demanded by consumers, as well as exercise pallet efficiency for storage and handling of our products.

We make our candles from eco-sustainable resources, such as recycled material cups and non-petroleum based wax.

GRAVEYARD LIGHTS

Our graveyard lights come in a great variety of sizes and shapes.

We use palm oil and paraffin wax to make candles in glass jars, topped by caps. This type of design provides the extended burning time even in the adverse weather.

PLASTIC LINE

We created oiler inserts and graveyard lights in plastic cups. Oilers can be used as candles in lanterns or to replace the memorial lights in glass jars.

The plastic graveyard candles are topped by caps to provide the extended burning time in the adverse weather.

OUTDOOR LIGHTS

The candles in tin cans will make any outdoor party special. Their flames are resistant to winds and will be a wonderful decoration in daylight and a perfect illumination at night, at the same time serving as mosquito repellents.

The candles in plastic containers will add a joyful touch to any garden. These lights can float and may serve as an amazing decoration in a pool or a fountain. These lights, however, are not intended for use in rivers or lakes.

We can produce candles per your design material or suggest our visual concepts based on your needs.
